DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

#7 The property known as the Michael Farm is located on the western section of Fort Frederick State Park northwest of the fort itself. The buildings are vacant, deteriorated and demolition is planned for them. A new visitor's center has been proposed for them:

The hosse is an early 20th century L - shaped balloon frame two story, three bay structure. Its facade or northeast elevation has been covered with rough stucco over sawn wooden laths. Other walls are sheathed with imitiation brick composition siding.

Windows have single pane double hung sashes with architraves having molded trim and flat top pieces. No evidence of shutter hardware remains. The main entrance is located in the center bay of the front elevation and is trimmed similarly ato the windows. Across athe front elevation is a one story porch with a stuccoed arched frieze and stuccoed posts. The roof of the house is covered with sheet metal. A block flue extends along the northwest end wall. The ell to the rear has a two story porch which has been partially enclosed with German siding.

Some distance north of the house is a two part timeber frame barn, consisting of two gambrel roofed sections set perpendicular to each other. Much of their vertical siding is gone, exposing the framing. Also part of the complex are numerous sheds and outbuildings.

STATEMENT OF SIGNIFICANCE

#8 The buildings in this deteriorated complex all appear to date from the early 20th century. They are typical of vernacular construction of the period. There is no known historical significance attached to these buildings and they have no particular architectural merit.
